## HEALTH & SAFETY TRAINING

# SAFE BY CHOICE

We want employees not only to follow the safety measures blindly, but to WANT to be safe.

---

The primary aim of this Safety course is to protect the organization's most valuable asset: its people.

This workshop reduces incident rates by helping the organization focus beyond safety to provide people the skills, knowledge and confidence they need to create an incident-free culture. This course works on changing old beliefs which will inevitably change the behavior. As a result, we create a safe and productive workplace.

The two-day workshop capitalizes on participants' production-oriented, "get the job done" strengths.

### Testimonials:

"Lots of good heart touching stories that hopefully will allow our supervisors to change from compliance to belief in safety"

- Abdullah Saleh, Aramco Safety Inspection Director

"Although it wasn't an easy task due to the negative perception for most attendees before the workshop, but you've succeeded to make it a real success. It's the first time for me to attend a workshop or training session and listen to only positive feedbacks."

- Mohamed Ghaffar, Egyptian Drilling Company, Safety Manager

## Why Choose Red Rock International?

- We speak the language of your people and we understand the diverse types of stresses that may lead up to an injury.
- our trainers are full-timers, they are committed to deliver a consistent message to all learners that will eventually build the injury-free culture we aspire.
- We are able to roll out a number of training courses simultaneously utilizing our dedicated training team.
- We use the power of simple language, real life stories and experiential learning to touch the hearts of learners and install the safety values that serve them after the training course.
- Last but not least, all our messages are accompanied by experiential learning and we boast to be the leaders in this type of learning.

### What you will learn

This safety course provides your organization and people a structured, proven approach for developing the culture required to deliver on your productivity and QHSE goals:

- How to commit to reducing at-risk behaviors which lead to incidents both on and off the job
- How to Identify and mitigate hazards thoroughly by recognizing how risk tolerance impacts safety
- Provide effective feedback to others on the safe and at-risk behaviors they demonstrate

### Learning Methodologies

- Experiential projects encourage individuals to demonstrate their existing strengths and practice new skills.
- Application projects ask participants to apply what they are learning to specific work situations.
- Action plans require individuals to commit to how they will behave differently in their day-to-day responsibilities through implementing the tools they learn

### Key Facts

#### Who is it for?

Any employee who might get injured at work and needs to be reminded of his/her safety

#### Duration

2 days

#### Course Formats

Instructor Led Training (ILT)  
A fully configurable course to complement your existing staff development programmes. Tailored to focus on key elements of your company culture.
